PROJECTS

Blog Application | ([Source Code](#))

- Developed a blog application using the MERN stack.
- Implemented user authentication and authorization using JWT (JSON Web Tokens).
- Utilized MongoDB for efficient post data management and Cloudinary for scalable image storage.
- Utilized GitHub for version control, ensuring seamless collaboration and code management.

Portfolio Website | ([Source Code](#)) | ([Live Link](#))

- Developed a personal portfolio website from scratch using React.
- Ensured cross-browser compatibility and mobile responsiveness using CSS media queries and flexbox/grid layouts.
- Deployed the website using Vercel, enabling fast, reliable, and easy deployment and accessibility.

EXTRA-CURRICULAR ACTIVITIES

Freelancer, Chegg

- Volunteered as a freelancer for Chegg, an online educational platform, delivering high-quality academic solutions to students.
