INTERNSHIP

Full Stack Developer Intern, Netesenz   June 2024-July 2024
- Completed basic training on AWS, Python, and MySQL to prepare for project tasks.
- Contributed in bi-weekly status calls, discussing project progress and plans with the team.
- Supported in developing and testing early prototypes to validate project concepts and gather initial feedback.
- Sought guidance and feedback from senior team members to improve technical skills.

ACADEMIC PROJECTS

NewsBot — *Discord Bot* | GitHub | Discord.js, Node.js, MongoDB
- Developed a Discord bot enabling users to create profiles and store their news preferences.
- Utilized Puppeteer to scrape news articles from Google News according to user preferences.
- Automated news scraping at user-defined intervals using Node Schedule.
- Added commands for searching news via API and accessing archived articles from the database.

BlogNest — *A Blog Web App* | GitHub | Live | MongoDB, Express, React, Node.js
- Integrated JWT authentication for secure and streamlined user access.
- Enabled users to create and edit blog posts with content stored in MongoDB and images uploaded to Cloudinary.
- Added pagination and categorization features for improved content navigation.
- Developed user profile pages where users can view their personal information and posts.

LinkShrinker — *URL Shortening Service* | Node.js, Express, MongoDB
- Allowed users to input long URLs and receive new shorter versions.
- Saved both original and new condensed URLs in MongoDB.
- Tracked and recorded the total number of clicks for each shortened URL.
- Provided analytics on the total number of shortened URLs and individual click counts.

TECHNICAL SKILLS

C++, HTML, CSS, JavaScript, React, Node.js/Express, MongoDB, MySQL, Git, GitHub

EXTRA-CURRICULAR ACTIVITIES

- Volunteered as a freelancer for Chegg, an online educational platform, delivering high-quality academic solutions to students.
